

THE SLAYER

Multi-Use Industrial Knife

The Slayer, designed with toughness in mind, cuts through a multitude of materials

Slayer's unique use of a 4" blade doubles the available cutting surface of other utility knives. This allows the user to cut many different materials. The 9" tool length dramatically increases the range of cut motion by more than 1.5", providing less hand fatigue and protection from objects in the cut path. Stop scraping your knuckles on tack strip! Equipped with 4 Better Tools scraper blades. Handle doubles as blade storage. When utility knives fall short, The Slayer gets the job done.
